ROLLER SHUTTERS

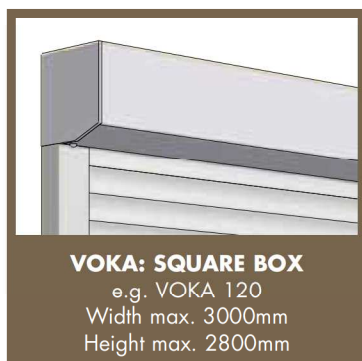

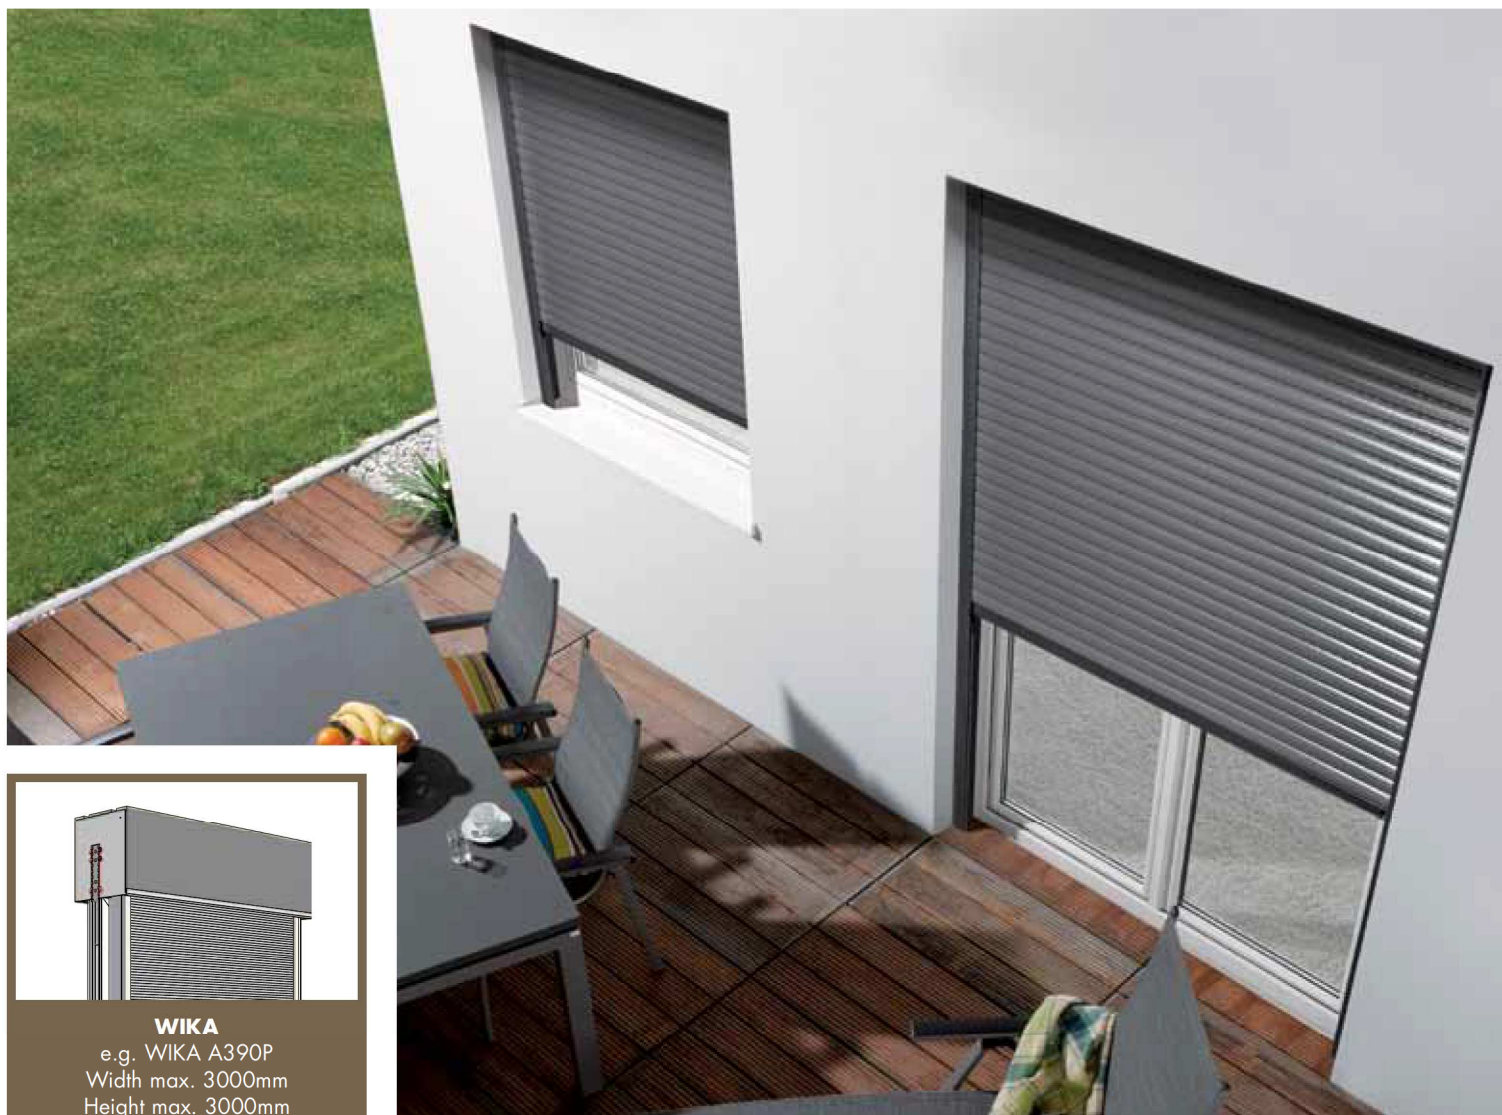

Many home owners rightly set high, comprehensive standards for protection from the sun: Noise control, weather protection and thermal insulation play a large role, personal well-being, but also aspects such as environmental protection, and energy and cost savings. In addition, there are considerations such as improving the security standard in the area of windows and patio doors. Furthermore, this sun protection should be very robust, durable and, where possible, still look good, be individually designable and ideally still flexible..... Too much to ask? Not with roller shutters from WOUNDWO, which can do all that and more!

No matter which type, whether with roller shutters or slat curtains, whether with square box, round box, plastered box, whether our VOKA or VOKA SLOPE, which as sloped roller shutters is the perfect solution for gable windows and triangular windows, or whether the WIKA, which is installed together with the window saving plenty of time and costs : roller shutters are the perfect solution for every requirement. Equip it with an integrated insect screen, choose from many operating variants and from more than 200 RAL colours. Our roller blinds are of course CE tested: high-quality and corrosion-resistant materials and coatings guarantee a long lasting product.

FULL OF ATMOSPHERE

VERTICAL AWNINGS

Vertical awnings are sturdy protection, colour and light play, pleasure, or to put it succinctly: they bring a good atmosphere into your home. As is normal for us, all of this goes hand in hand with top functionality: prevent a your living space overheating in summer and simultaneously enjoy the atmosphere of brightness and transparency, of light and colour, choose from over 200 frame colours and several different materials for your blinds! This provides shade, creates a colour ambience, designs and decorates. The fabric is a mood element and influences personal well-being by filtering and colouring the light and as such lends the room and the environment a very special colour mood.

From the classic NOVOLINE, to the puristic OPENLINE, the versatile MARKISOLETTE, to the innovative ZIPLINE: with our product range, each requirement has a solution, each installation situation will find the right way! Equip your vertical awnings with a radio control with remote control and combine comfort and utility: WOUNDWO also supplies the appropriate automatic control for your vertical awnings, so that the time switch and room thermostat deal with everything automatically.

VENETIAN BLINDS & STANDARD VENETIAN BLINDS

Create the perfect play of light! Venetian blinds allow you to perfectly adjust the room climate to your needs. They offer optimum heat protection from direct exposure to sunlight and also enable you to achieve the best possible control of daylight, as the slat position can be adjusted almost infinitely. Venetian blinds differ from their "close relatives", standard Venetian blinds, mainly due to an extremely robust design, which guarantees high wind stability, their track or cable guide, over 200 RAL colours, as well as 12 modern slat colours and several different slat shapes: these are available in various widths and geometries, which all offer different optics and functionality!

No matter which you choose from the many product and cover options, for which special solution, be it VOKA-SKY, SKY-MULTI, the WIKA-SKY System that is fitted together with the window to save time, or the integrated insect protection - a Venetian blind or a standard Venetian blind from WOUNDWO is a partner for life! High quality and corrosion resistant materials and coatings guarantee the longevity of this CE tested product.

INSECT PROTECTION

Stop the plague of insects - without any chemicals! WOUNDWO has the ideal solution so you can enjoy your days, and above all your nights, in peace once again. No matter whether a solution for windows or doors, no matter whether as a side-hinge or clamped frame, as an insect protection roller blind, or as a large sliding installation for patio glazing: installed in a few steps, our items guarantee fresh air in all rooms without having to fight insects with chemicals products. Insect protection - always exactly as you want it. Choose from numerous special solutions: with cat and dog flaps, as lightwell covers, in one of many special shapes, in combination with sun protection, in various fabric variants, which all offer great advantages and special abilities!

From fibre glass, Transpatec and Transpatec fine mesh fabric, to pollen protection fabric, polyester mesh and stainless steel mesh fabrics, to HF electrosmog fabric: it's all here! Furthermore several of our insect protection fabrics bear the "Blue Angel" mark, which is awarded to particularly environmentally friendly products and services. Moreover all WOUNDWO insect protection items are available in 9 trendy standard colours, or, should that not suffice, in 200 additional RAL colours.
